- Blade change safety tool included

Supplies:

- 27-10: Replacement Blade
- 27-20: Replacement Cutting Sticks, pkg of 8

Cut-True Cutters

Formax - New Hampshire, USA
www.formax.com

Local Dealer:

The Formax **Cut-True 27A Automatic Programmable Paper Cutter** offers precision cutting for paper stacks up to 18.9" wide. User-friendly features include a touchscreen control panel, automatically-adjusting back gauge, and the ability to program up to 99 jobs with up to 30 cuts each. An **infrared light beam safety curtain** provides safety and convenience as it shuts down operation if the light plane is interrupted.

Operation is simple: utilize the **touchscreen** to program and select job settings, then load a stack of paper, up to 3.15" high. Set the back gauge directly by using the touchscreen, or by using the electronic hand wheel. Dual push buttons engage the **automatic clamp** and hold the paper stack securely in place. The bright **LED Cutting Line** allows operators to see exactly where the blade will cut and make fine adjustments if needed. **Electronically-controlled two-hand operation** engages the hardened steel blade for crisp, accurate cuts, every time.

Standard **safety features** include a lock with key, blade lock, external blade depth adjustment, automatic blade return from any position, easy-to-use blade change safety tool, and a wooden paper push for safe alignment. The rugged metal stand is also included, providing a stable work surface, with a shelf for convenient storage.

The Cut-True 27A is ideal for transforming brochures, invitations and more, with crisp, accurate cuts, and is a welcome addition to print shops and in-plant finishing operations.

Cut-True 27A Standard Features

Infrared Light Beam Safety Curtain

Immediately stops operation if the light plane is interrupted

LED Cutting Line

Shows exactly where the blade will cut, allowing for precise adjustments

Touchscreen Control Panel

Set cutting lengths, then program and save up to 99 jobs, with up to 30 cuts each

Electronic Back Gauge Adjustment

Fine-tune control for precision cutting

Two-Hand Operation

Automatically engages clamp and blade, keeping hands away from the cutting area

Crisp, accurate cuts

High-quality hardened steel blade for razor sharp cuts, time after time
